

Jreanne Ramgeet

Junior Software Developer | Full-Stack Development · Python & Machine Learning · API & Workflow Automation
Brampton, ON | 647-909-5268 | jreanner@gmail.com | Portfolio: jreejuggin.github.io/portfolio | GitHub: github.com/jreejuggin

KEY ACHIEVEMENTS

- Directed the design and build of a healthcare patient-scheduling platform (Next.js, TypeScript, Prisma), from requirements through a working booking flow that prevents double-booking
- Built and deployed an automated workflow that tracks job applications from Gmail into Google Sheets across 4+ platforms, cutting out manual data entry
- Achieved 90% classification accuracy on a 50,000-review sentiment analysis task using a custom CNN built in TensorFlow/PyTorch

CORE SKILLS

- Languages:** Java, Python, TypeScript, JavaScript, SQL, HTML/CSS
- Frameworks & Libraries:** Next.js, React, Flask, Prisma, TensorFlow, PyTorch, scikit-learn
- Databases:** PostgreSQL, Azure SQL, SQLite
- Tools & Platforms:** Git/GitHub, Docker, n8n, VS Code, Android Studio, IntelliJ, JUnit
- Concepts:** REST API Design, System Architecture, Data Structures & Algorithms, OOP, Socket Programming, Authentication, Unit Testing, Agile

PROJECTS

Dental Web Scheduler — Full-Stack Patient Scheduling Platform

In Progress

Next.js · TypeScript · Prisma · PostgreSQL

- Planned the system before writing code: defined requirements, system architecture, API routes, and data model for a healthcare scheduling app
- Built the core booking flow, including logic so two patients can't accidentally book the same appointment slot
- Working with audit logging and access-control features to meet PHIPA (Ontario healthcare privacy) requirements

Job Application Tracker — Workflow Automation

n8n · Gmail API · Google Sheets API · Docker

- Built an automated workflow that monitors Gmail, pulls key details (company, title, date applied, source, and more) from application emails, and logs them to Google Sheets
- Added logic so the tracker updates an application's status automatically (interview, offer, rejected) as new emails arrive, without creating duplicate rows
- Tested the workflow against real confirmation emails from 4+ sources (LinkedIn, Indeed, Workday, direct company ATS)

Sentiment Analysis on IMDB Movie Reviews — CNN Text Classification

Python · TensorFlow/PyTorch · scikit-learn · NumPy · Pandas

- Built a 5-layer convolutional neural network (embedding, convolutional, pooling, and two fully connected layers) that classifies movie review sentiment with 90% accuracy
- Trained and evaluated the model on 50,000 IMDB reviews (25,000 train / 25,000 test), handling preprocessing and feature scaling with NumPy, Pandas, and scikit-learn

Networked Connect 4 — Java Socket Programming

Java · TCP/Socket Programming · Swing

- Built a client-server multiplayer Connect 4 game in Java, with a centralized server managing real-time game state for concurrent TCP client connections
- Developed two interchangeable client interfaces (a Swing GUI and a terminal/netcat CLI) connecting to the same server, with input validation enforcing legal moves

Additional Projects: Plagiarism Detection System (Python, Flask, Azure SQL) · Android Event Scheduler (Java, SQLite) · Roblox Tycoon — GUI Developer (Roblox Studio, team project) · Personal Portfolio Site (link above)

LEADERSHIP

Vice President — Women in Computer Science Club

- Organized academic, networking, and social events for computer science students and helped build an inclusive community for women in tech

Peer Mentor — Faculty of Math

- Guided students through university coursework and campus-life transitions through one-on-one mentorship

ADDITIONAL EXPERIENCE

Grocery Clerk — No Name

Sept 2024 – Apr 2025

- Operated POS systems and resolved customer concerns accurately and efficiently in a high-volume retail environment

Omni Channel Specialist — Best Buy

Oct 2023 – Dec 2023

- Delivered technical troubleshooting support and resolved customer issues, improving satisfaction outcomes

EDUCATION

Bachelor of Science (Honours), Computer Science — Concentration in Artificial Intelligence

Brock University — Dean's Honour List (2022)

Jan 2022 – June 2026
